SUBJECT:

U.S. Environmental Protection Agency Sampling Results

TO:

Ex. 6 - Personal Privacy

Bay City, MI 48708

FROM:

U.S. EPA Flint Water Team

As you requested, a copy of your test results from water samples taken a Riverfront Plaza, Apt. on 3/25/2016 are attached. The full results include levels for many elements. U.S. EPA collected these samples as requested by the Michigan Department of Health and Human Services (MDHHS). We are happy to provide these final results to you, but will be not able to give health interpretation of the data. You can expect a formal letter from MDHHS with a narrative that provides an overall summary and interpretation, which includes a comparison table for each analyte to a health-based criteria. We have been told that due to the complexity of preparing the letters for each residence it will take some time to complete the task and that when residents were contacted with their preliminary results that they were provided an estimated timeframe. If you have additional questions on your results or when the letter will be sent, please contact MDHHS at 1-800-648-6942.

To keep yourself safe, U.S. EPA recommends that you continue to follow the "Drinking Water Advice to All Flint Residents" below.

Drinking Water Advice to All Flint Residents

Until further notice, people should only consume filtered or bottled water. Filtered water is a safe option ONLY if your filter is NSF-certified to remove lead and you follow all the instructions on how to use it and when to replace it.

- For babies under 1 year old: use only bottled water for water, food and formula
- For pregnant or breastfeeding women and children under 6 years of age: bottled water is the safest choice

DO NOT drink unfiltered water. It's not safe!

DO NOT cook or brush teeth with unfiltered water

DO NOT allow babies and children to drink bath water
